PROFESSIONAL EXPERIENCE

Texas A&M University — Remote (Houston, TX)

Jan 2024 – Present

Web Applications Developer I

- Developed reusable frontend components for the **Aggie UX Design System** using JavaScript, HTML, and SCSS, powering **400+ Texas A&M System websites**, including tamu.edu.
- Resolved **200+ GitHub issues (approximately one-third of the team's workload)** involving accessibility, responsive design, UI defects, and component enhancements.
- Developed **WCAG-compliant**, responsive interfaces that improved accessibility and consistency across the university's web ecosystem.
- Enhanced **Storybook documentation** and component organization, improving developer experience and adoption across teams.
- Collaborated with designers and developers in **Agile Scrum** sprints to deliver production-ready frontend features.
- Awarded the **Texas A&M President's Meritorious Service Award** as part of the Aggie UX team for contributions to scalable university web platforms.

Texas A&M University — College Station, TX

Nov 2022 – Dec 2023

Web Communications Intern

- Maintained and enhanced **50+ university websites**, improving accessibility, responsiveness, and content quality.
- Supported **CMS migrations** and departmental redesigns while collaborating with university stakeholders.

SELECTED PROJECTS

150.tamu.edu — JavaScript, HTML, CSS/SCSS, Cascade CMS

- Led end-to-end frontend development for **150.tamu.edu**, delivering the project **within 3 weeks**.
- Built custom interactive components including image comparison sliders and timeline experiences.
- Developed responsive, WCAG-compliant interfaces for a public-facing university website.

AI Crisis Support Platform — React, JavaScript, Express, OpenAI API, HTML, SCSS

- Built a **full-stack AI-powered** mental health support application using **React, Express, and the OpenAI API**.
- Developed a responsive chat interface with animated onboarding, dynamic rendering, and client-side state management.
- Built an **Express backend** that securely handled OpenAI API requests using **REST endpoints**, environment variables, and server-side request validation.
